

Saving lives by creating heart-safe environments

Project ADAM is a community-based program that educates school systems, youth sports groups and communities about sudden cardiac arrest and how to implement programs to create heart-safe environments.

Are your schools and communities **heart-safe** and prepared to respond to a sudden cardiac arrest?

YES! Our schools and communities are prepared!

Visit this QR code to learn more about our heart-safe programs and connect with or start an affiliate program in your state.

NO! We need help implementing **heart-safe** programs

Does your state have a Project ADAM program?

YES! Connect with an affiliate site team member near you.

View full list of affiliates and team members at projectadam.com/projectadam/our-team

NO! Start a Project ADAM team in your area!

Visit projectadam.com/projectadam/join-our-team page, or email projectadam@childrenswi.org

All Project ADAM Heart Safe programs, education and training are provided at no cost thanks to the support of each local affiliate program across the country.
