

Pharmacy Residents

Kids deserve the best.

Justin C. Staubli, PharmD, MS (PGY-2)

Post-Graduate Training: PGY-1 at Children's Wisconsin

Pharmacy Education: University of Wisconsin – Stevens Point & The Ohio State University

What have you enjoyed about residency at CW: I have thoroughly enjoyed my residence so far at CW for 3 reasons: the commitment and dedication of the preceptors who expertly balance your time as a resident between a learner and independent practitioner, the integration of pharmacy within the institution as you round as a decentralized pharmacist while on rotation, and the flexibility of the program, which has allowed me to tailor this program to my professional and career interests.

Haley Olkiewicz, PharmD (PGY-1)

Pharmacy Education: Concordia University Wisconsin School of Pharmacy

What have you enjoyed about residency at CW: I am honored to be a part of Children's Wisconsin as my patient-centered goals strongly align with the inter-professional teams I am a part of. I enjoy the high level of patient care, mathematics, and pharmacotherapy involved in caring for the pediatric population. Lastly, I appreciate the continuous education provided within the hospital and pharmacy department.

Jenna Gradinjan, PharmD (PGY-1)

Pharmacy Education: University of Wisconsin – Madison School of Pharmacy

What have you enjoyed about residency at CW: I love Children's Wisconsin because of the amazing people I get to work with every day! The pharmacy department was extremely welcoming since day one, and I couldn't imagine working anywhere else. I chose pediatric pharmacy because kids are incredibly inspiring, resilient, and help make my job more fun.
