## Midwest Pediatric Cardiology Education Forum

Hosted by:

Herma Heart Institute

## HLHS: Fetal Development through the Interstage Period

**When:** October 27, 2025 | 8:00 am - 4:30 pm

**Where:** Children's Wisconsin Auditorium  
(Virtual Option available)

**Cost:** Free

**Speakers:**

- Children's Wisconsin
- Ann & Robert H. Lurie Children's Hospital of Chicago
- American Family Children's
- University of Chicago
- Helen DeVos Children's Hospital

**Continuing education credit will be offered, including for,  
nurse practitioners, nurses, and physician associates**

## Topics

- **Fetal Development & Diagnosis:** Discover how HLHS begins — from embryology and fetal imaging to prenatal planning that shapes postnatal outcomes.
- **Imaging & Interventions:** Learn how echocardiography, cardiac MRI, and catheter-based procedures guide diagnosis and early management.
- **Stage I Surgical Approaches:** Dive into the evolving world of Norwood repair, Sano vs. BTT shunts, and hybrid strategies.
- **Postoperative CICU Management:** Master the art of balancing Qp:Qs, managing shunt-specific challenges, and supporting single-ventricle physiology.
- **Interstage Monitoring & Outcomes:** Explore why the time between surgeries matters — and how current strategies improve survival and growth.
