Treatment of mild-moderate COVID-19 outside CW (Paxlovid from community pharmacies)

- Assessing patient's med list for drug-drug interactions and making medication adjustments^c. Consider reaching out to relevant CW specialist for difficult to manage interactions^d. Do not assume that community pharmacies will identify drug-drug interactions.
- Speaking to the patient/family to confirm interest in Paxlovid, review Paxlovid Fact Sheet, and provide instructions for adjustment of interacting medications
 - Communicate with PCP to offer COVID-19 vaccine after isolation period (if eligible, slide 8)
- 2. Review team is available via the Liaison if seeking advice on appropriateness of Paxlovide

a. Risk factors for severe COVID-19 from CDC (more inclusive than CW priority list)

https://www.cdc.gov/coronavirus/2019ncov/hcp/clinical-care/underlyingconditions.html

b. Pharmacies that received distributions of Paxlovid: https://www.dhs.wisconsin.gov/covid-19/treatments.htm or https://covid-19-test-to-treatlocator-dhhs.hub.arcgis.com/

Skywalk does not have a supply of Paxlovid as of 5/19/22. Epic and other EMRs will not alert providers if a pharmacy does not carry Paxlovid.

c. Resources to assess for drug-drug interactions with Paxlovid in addition to Lexicomp:

https://www.covid19-druginteractions.org/checker https://www.med.umich.edu/asp/pdf/outpatient_guidel ines/Paxlovid-DDI.pdf

https://www.covid19treatmentguidelines.nih.gov/thera pies/antiviral-therapy/ritonavir-boosted-nirmatrelvir-paxlovid-/

- d. CW providers can be paged through the CW operator at 414-266-2000 or physician access center.
- e. The Outpatient COVID-19 Treatment Liaison is available M-F/8-4 through Voalte or the online intake form (see COVID treatment page in intranet or https://childrenswi.org/medical-professionals/tools-andresources/covid-19-resources). The on-call ID attending can be paged for afterhours urgent questions.
