HOSPITAL & MAIN CAMPUS FIRE RESPONSE PLAN  Egress/Fire Protection Plan: Q:\P&P - Safety\Fire Plans & Egress Plans\Egress Floor Plans	ADDITIONAL DEPARTMENT SPECIFIC RESPONSE		
I. Staff Response at fire scene - RACE			
NFPA Occupancy Type:	Healthcare		
Special Notes:			
<u>R=RESCUE</u> – <u>R</u> ACE			
<ol> <li>Remove patient and staff that are immediately in danger.</li> </ol>			
2. Call out to fellow staff members to activate fire alarm system if you cannot			
immediately initiate by yourself.			
A=ALARM - RACE	Location of fire alarm pull stations:		
1. Activate the nearest fire alarm pull station.	1. Stairwell 17 (North)		
2. Dial "88" and give operator location of fire.	2. Stairwell 18 (West)		
3. Security places follow-up phone call to fire department to verify alarm received.			
C=CONTAIN - RACE			
Close doors isolating smoke and/or fire.			
2. Leave lights ON.			
3. Turn off all unnecessary equipment if the situation permits.			
4. If medical gases are in the room where actual fire is located, isolate gases once			
all patients on O2 have been safely transferred to portable units. (See below for			
details)			
<u>E=EXTINGUISH</u> - RAC <u>E</u>	Location of five cuting vieles		
Extinguish fire using proper fire extinguisher	Location of fire extinguishers:  1. Stairwell 17 (North)		
2. Fires larger than a small waste basket or producing large volume of smoke	2. Stairwell 18 (West)		
should be contain and area evacuated.	Stan wen 16 (West)     Nursing Station (Across from patient room		
3. Extinguisher Operation -PASS	T429)		
a. <b>P</b> ull the pin.	4. Across from Patient Room T413		
b. <b>A</b> im the nozzle at the base of the fire.			
c. <b>S</b> queeze the handle to discharge the contents			
d. <b>S</b> weeping motion with the nozzle.			
4. If unable to extinguish fire, contain fire and evacuate to a safe area.			
E=Evacuate - RACE	The unit is divided into two smoke		
Inpatient and Outpatient Units (Hospital Only)	compartments. The compartment runs		
1. In patient care areas evacuation is directed by charge person or incident	between rooms T435 and T436 with the smoke		
command.	compartment doors located in the east to west		
2. Patients should be safely evacuated. The choice of route is as follows.	corridors.		
3. Move horizontally to adjacent smoke compartment or patient suite area			
through labeled smoke compartment doors.			
4. Evacuate downwards-using stairways when possible.			
5. Use elevators <b>only</b> upon clearance from Fire Department.			
Non-Patient Care Areas (Hospital Only)			

Supersedes: 08/09, 06/21 Reviewed: 12/22/21

	HOSPITAL & MAIN CAMPUS FIRE RESPONSE PLAN	ADDITIONAL DEPARTMENT SPECIFIC
	Egress/Fire Protection Plan: Q:\P&P - Safety\Fire Plans & Egress Plans\Egress Floor Plans	RESPONSE
1.	Equipment and other obstacles in corridors need to be removed and placed in	NEST STISE
1.	non-occupied rooms.	
2.	Ensure smoke and fire separations doors are not obstructed and in closed	
	position to limit the spread of smoke and/or fire.	
II.	Staff Response Away From Fire Scene	
HOSPIT		
a.		
	needed.	
b.	Close doors.	
c.	Clear corridor completely of obstructions.	
d.	Do not use elevators or travel corridors.	
e.	Move patient and visitors to safe area.	
f.	Leave area lights on.	
CLINIC	Building & CORPORATE CENTER	
	ncilities require total building evacuation when the fire alarm is identified	
	the specific building. If alarm is in a different building on campus,	
	tion is not necessary unless directed by Incident Command or Fire	
Depart		
	Fire Situation Return to Normal Operations	
	Alarm –All Clear	
1.	Building and staff will remain in "fire alarm response" until the event has been	
,	cleared by the fire department.	
۷.	Upon Fire Department approval, operator will be instructed by Facilities Operations to issue "Fire Alarm All Clear"	
2	Upon "Fire Alarm All Clear" staff can resume normal operations.	
	nded Alarm - Return to Normal Activity	
	An unintended occurs when the response team has clearly identified the	
1.	source of the alarm and it is not related to an actual fire event.	
2	Facilities Operations will instruct the operator to announce "Fire Alarm Return	
2.	to Normal Activity".	
3.	Staff not in the immediate area of the fire alarm may return to normal	
	activities.	
4.	The fire alarm system will not be reset. Doors will remain closed, stair fans	
	continue to run, HVAC system will remain in a fire control mode, and strobes	
	will continue to flash.	
5.	Full systems reset will not occur until the fire department has arrived and given	
	final approval to call an "All Clear."	
6.	Security staff member will hold an elevator for transportation of responding	
	fire department.	
Event D	ebriefing	<del></del>
1.	Departments involved in the fire alarm location should complete the "Fire Drill	
	Activation Team Observer Response Form" attached to the Fire Drill Policy and	
	return to Facilities Operations.	
2.	Facilities Operations will review event and report finding to the Safety	
	Committee.	
3.	Facilities Operations is responsible to complete state reporting of fire events.
