

Parent access

What is the Wisconsin Immunization Registry (WIR)?

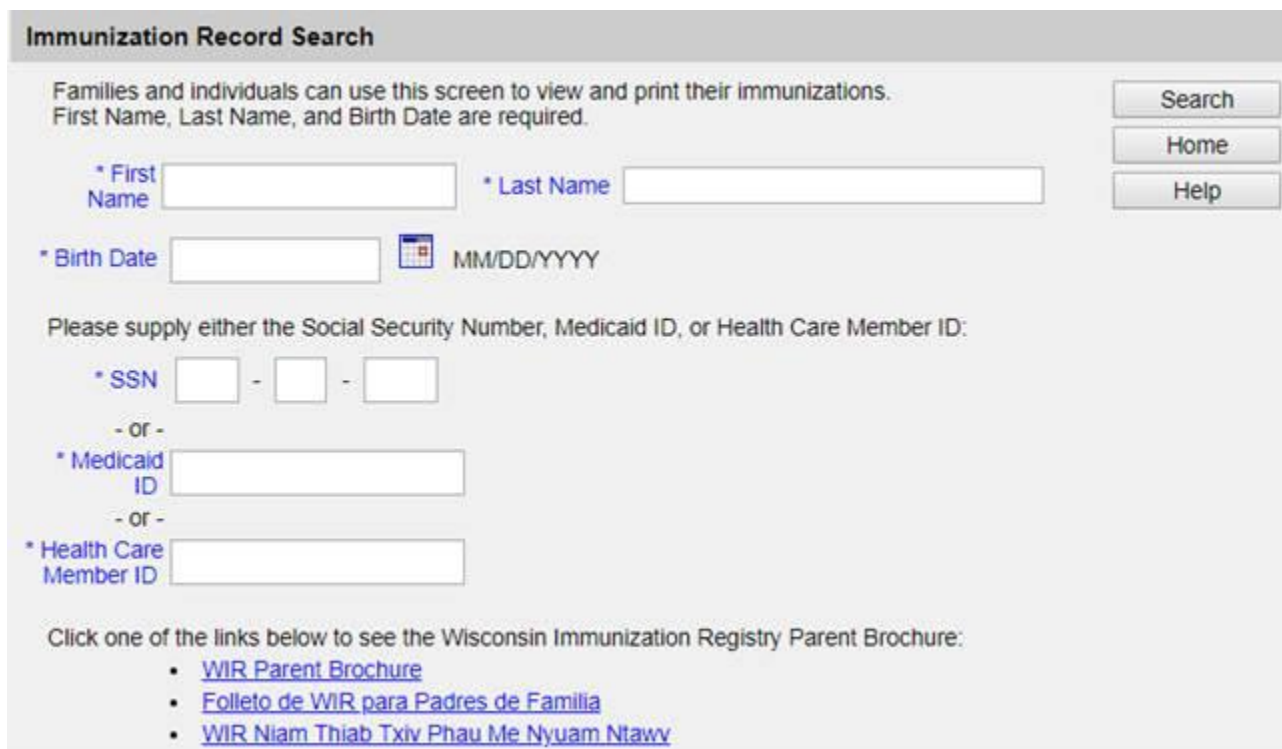

Many children get immunizations (vaccinations) from more than one clinic or health care provider. The WIR is a computerized system that keeps track of immunizations. Parents and providers can access the system at any time to see what vaccines have been given and which ones are due.

How do I find my child's vaccine records using the WIR website?

Click <https://www.dhfswir.org/PR/clientSearch.do?language=en> to go to the WIR Public Immunization Record Access page.

To get to your child's record you will need this information:

- 1 Child's first and last name.
- 2 Child's date of birth MM/DD/YYYY.
- 3 One of these numbers:
 - a. Child's Social Security Number in the form xxx-xx-xxxx **or**
 - b. Child's Medicaid ID Number
 - c. Health Care Member ID

A screenshot of the WIR search interface. At the top, it says "Immunization Record Search". Below that, a message states: "Families and individuals can use this screen to view and print their immunizations. First Name, Last Name, and Birth Date are required." To the right of this message are three buttons: "Search", "Home", and "Help". The form contains several input fields: "* First Name" and "* Last Name" (text boxes), "* Birth Date" (a date picker showing MM/DD/YYYY), and three options for identification numbers: "* SSN" (three separate boxes for digits), "* Medicaid ID" (a single text box), and "* Health Care Member ID" (a single text box). At the bottom, there is a link to a parent brochure with three options: "WIR Parent Brochure", "Folleto de WIR para Padres de Familia", and "WIR Niam Thiab Txiv Phau Me Nyuam Ntaw".

Click **Search** (upper right).

This sheet was created to help you care for your child or family member. It does not take the place of medical care. Talk with your healthcare provider for diagnosis, treatment and follow-up.
