

Resources for language development and hearing loss

These resources will be helpful after your child gets a hearing device.

Alexander Graham Bell Association for the Deaf and Hard of Hearing

- <https://www.agbell.org/>

Provides information on listening and spoken language. Provides broad resources for families, including opportunities for parents and children with hearing loss to connect. Membership is free.

- Parent Support Chats Events
- Contact: parentsupportline@agbell.org, 202-204-4680

- <https://www.agbell.org/Families/Family-Resources>

Expected Language Development at each Age Stage following Device Fitting (Ages and Stages tab). More resources can be found under **Family Resources** tab.

Masters Family Speech and Hearing Center

- <https://childrenswi.org/medical-care/speech-and-hearing-center>

Speech-Language Pathologists at Children's Wisconsin focus on hearing loss, and meeting speech and language developmental milestones. Therapy targets language skills with a listening focus. Can meet with you one-on-one to help you learn and practice language listening skills at home.

Hearing First

- <https://www.hearingfirst.org/>

A way to teach infants and children with hearing loss spoken language through listening.

Hear Wisconsin

- <https://hearwi.org/kellogg-child-family>

Works with parents to focus on listening as the primary input for learning language. Activities teach a child how to use sound while wearing their hearing aid or cochlear implant. Provides Auditory Verbal Therapy services and toddler communication groups.

- Contact the Audiologist/Certified Auditory-Verbal Therapist, 414-604-7206
