

Prepare your vehicle for winter driving

As a new teen driver, this may be your first winter on the road. By now, you know that a well-maintained vehicle is always important. It becomes especially important during harsh winter weather conditions. The following are things to keep in mind to stay safe:

Keep your fuel tank at least half-full. This will help prevent fuel lines from freezing, and provide necessary fuel should you become stranded.

Make sure your tires have good tread/traction and are properly inflated. Winter tires are ideal.

Ensure that your battery, anti-freeze and cooling system are in good condition.

Replace worn windshield wipers. Have plenty of washer fluid.

Make sure that headlights and other vehicle lights are operating properly.

Before driving, always clear snow and ice from your vehicle's windows, front and rear lights, hood and roof.
