

Ambulance Path

EMERGENCY DEPARTMENT TRAUMA CENTER

Inbound ambulance vehicles will access the Children's Wisconsin Campus from W. Watertown Plank Road and travel south on W. Connell Avenue to a point just south of the existing parking structure. Ambulances will then turn right heading west on the roadway south of the parking structure and then turn left proceeding south up an incline and pass under the Skywalk Building bridge. After notification of arrival via post-mounted intercom, an indicator light above the ambulance garage door will signal when the door is fully open.

Outbound ambulance vehicles will exit the ambulance garage heading west and turn right heading north. Then proceeding back east through the dedicated emergency parking lot, make a U-turn and proceed west on the roadway south of the parking structure to N. 92nd Street and destinations thereafter.
